

ASSOCIATED PLASMATRON PVT. LTD.

ENVIRONMENTAL POLICY

We are fully committed to mitigating the environmental impacts of our current and future activities. Monitoring and reducing adverse impacts of the organizations' operations on the environment and local community will be management's priority. We shall focus on prevention of pollution; efficient use of energy, water and materials; minimizing waste; re-use and recycle wherever possible - both in the design and management of our operations and facilities.

We shall develop objectives and targets to continually improve our environmental performance. We shall assure compliance with environmental legislation and progressively adopt best practices followed internationally.

Further :

- By-products of our operations impacting the environment shall be adequately monitored and controlled
- We shall avoid the destruction of flora and fauna as well as ecosystems in our areas of operation
- An enduring programme of responsible waste management will be strictly enforced
- ISO 14001 will be implemented in a progressive manner to control and mitigate the effects of our activities on the environment
- Compliance with relevant legal, statutory, regulatory and client requirements will be an unwavering priority of the Company

S. P. G. KUDVA
